

Changes in Statistics Finland's statistics production

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
1. Economy and globalisation				
1. National economy				
Growth and productivity measures	Production of the statistics is suspended.	Statistical reference year 2026	The production of the statistics will be suspended for the duration of development and finding funding for the renewed data.	During the development stage, data on Finland's productivity development are available from international sources (Eurostat, the OECD) and can be calculated based on national accounts.
Trend Indicator of Output	Production of the statistics continues unchanged.			
Value added based international trade (experimental statistics)	Production of the statistics is suspended.	Statistical reference year 2025		Decisions on the production of experimental statistics are made at Statistics Finland annually depending on the resources available. The production and development of the statistics can be continued if separate funding is found for the production and development.
Income, expenditure and debt of providers of local government services (experimental statistics)	Production of the statistics continues unchanged.			
2. Enterprises				
Bankruptcies and business restructuring proceedings	The publication frequency of bankruptcy data is changed.	Statistical reference year 2027	The data on bankruptcies will in future be published quarterly. The data on enterprise restructuring proceedings will remain an annual release.	The proposal according to the feedback from the consultation round to publish data less frequently will achieve the desired savings in the production process.

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
New orders in manufacturing	Production of the statistics is discontinued.	Statistical reference year 2027	The production of the monthly statistics is discontinued.	EU legislation on new orders in manufacturing was removed after the statistical reference year 2011. Data describing the economic outlook of manufacturing are also produced in other data sources, such as the statistics on new orders and order stock by the Technology Industries of Finland and the Business Tendency Survey by the Confederation of Finnish Industries. The production of the statistics can be continued if separate funding is found for the production.
Statistics on business subsidies	Production of the statistics is suspended.	Statistical reference year 2026	The production of the annual statistics is discontinued.	The production of the statistics can be continued if separate funding is found for the production. For the time being, data are available in the business subsidy information service maintained by the Ministry of Economic Affairs and Employment: https://tem.fi/yritystukitietopalvelu (in Finnish)
Corporate acquisitions (experimental statistics)	Production of the statistics is suspended.	Statistical reference year 2025	The production of the annual statistics is discontinued.	Decisions on the production of experimental statistics are made at Statistics Finland annually depending on the resources available. The production and development of the statistics can be continued if separate funding is found for the production.
3. Prices and consumption				

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
Inflation by population group (experimental statistics)	Production of the statistics is suspended.	Statistical reference year 2027	The production of the quarterly statistics is discontinued.	Decisions on the production of experimental statistics are made at Statistics Finland annually depending on the resources available. The production and development of the statistics can be continued if separate funding is found for the production.
4. Housing and construction				
Cost index of civil engineering works	Production of the statistics continues unchanged.	Statistical reference year 2027	In future, the data will be produced with separate funding as OSF statistics.	Special indices are mainly produced as customer-funded.
Index of real estate maintenance costs	Production of the statistics is discontinued. Data production will continue as part of the chargeable Built environment service.	Statistical reference year 2027	Quarterly data are available through the chargeable Built environment service.	Special indices are mainly produced as customer-funded.
Renovation building	Production of the statistics continues unchanged.			
Trend indicator of renovation building	Production of the statistics continues unchanged.			
Rents of dwellings	Production of the statistics continues unchanged.		New content for postal code areas will also be produced in the Built environment service.	
Finance of housing companies	Production of the statistics continues unchanged.			
2. Innovations and digitalisation				
1. Digitalisation				

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
Financial statement indicators for innovation activity (experimental statistics)	The production of the statistics continues unchanged in 2027 to 2028.			The statistics are produced with EU Grant funding. Decisions on production after 2028 will be made later.
3. Society and equality				
1. Population and society				
Adoptions	Production of the statistics is discontinued.	Statistical reference year 2026	Key adoption data of the annual statistics are published as part of the family statistics.	
Population projection	Statistics continue as revised.	Release in 2027 or 2028	The statistics continue as revised, necessary development is carried out in cooperation with population and pension researchers.	Development needs in the feedback from the consultation round are observed. Projections taking uncertainty into account are developed alongside the deterministic single model. Separate funding is sought for the development measures.
Deaths by week (experimental)	Production of the statistics is discontinued.	Statistical reference year 2027		The grounds for the availability of rapid data have disappeared after the pandemic, the demand for data can be satisfied with the existing population statistics/ preliminary population statistics .
2. Justice and elections				
Parliamentary elections	Production of the statistics continues as reduced.	Election year 2027	The statistics are produced on final voting data, the nomination of candidates and background information on voters. Regional tables/data on the candidates' results are removed.	Rapid election statistics have become revised and required correction rounds. Statistics Finland focuses on statistics the source of which are confirmed election results. Data can also be found in the Ministry of Justice's information and result service incl. regional data. https://tulospalvelu.vaalit.fi/en/index.html

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
County elections	Production of the statistics continues as reduced.	Election year 2029	The publication of the statistics is reduced. Final voting data are produced. Changes will be specified in 2029.	Rapid election statistics have become revised and required correction rounds. Statistics Finland focuses on statistics the source of which are confirmed election results. Other changes will be specified later. https://tulospalvelu.vaalit.fi/en/index.html
Municipal elections	Production of the statistics continues as reduced.	Election year 2029	The publication of the statistics is reduced. Final voting data are produced. Changes will be specified in 2029.	Rapid election statistics have become revised and required correction rounds. Statistics Finland focuses on statistics the source of which are confirmed election results. Other changes will be specified later. https://tulospalvelu.vaalit.fi/en/index.html
European Parliament elections	Production of the statistics continues as reduced.	Election year 2029	The publication of the statistics is reduced. Final voting data are produced. Changes will be specified in 2029.	Rapid election statistics have become revised and required correction rounds. Statistics Finland focuses on statistics the source of which are confirmed election results. Other changes will be specified later. https://tulospalvelu.vaalit.fi/en/index.html
Presidential elections	Production of the statistics continues as reduced.	Election year 2030	The publication of the statistics is reduced. Final voting data are produced. Changes will be specified in 2030.	Rapid election statistics have become revised and required correction rounds. Confirmed election results are published on the election rounds. Other changes will be specified later. https://tulospalvelu.vaalit.fi/en/index.html

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
Debtors in enforcement	Production of the statistics is suspended.	Statistical reference year 2026		The annual statistics are suspended for the time being as Statistics Finland's individual data resources are renewed. The aim is to produce more extensive statistics on indebtedness in future. The schedule will be revised during 2027. The National Enforcement Authority Finland publishes statistics on the topic: Statistics - Enforcement Authority (in Finnish)
Prosecutions, sentences and punishments	Production of the statistics continues as reduced.	Statistical reference year 2026	The table production of the annual statistics will be reduced by, e.g. prohibitions to keep animals, hunting prohibitions as well as changes in convictions by courts of first instance and district courts and appellants in courts of appeal.	The production process of the statistics will be lightened while retaining the key data content for users. In addition to strengthening justice statistics, means to develop data production related to criminal and justice statistics are explored in cooperation with administration.
Statistics on offences and coercive measures	Production of the statistics continues as reduced.	Statistical reference year 2026	The table production of the annual statistics will be reduced as concerns detailed statistics on municipal parking supervision, thefts of a motor vehicle for temporary use, preliminary official tasks by municipality, time of the offences, offences against property, and coercive measures of the police, customs and border guard.	The production process of the statistics will be lightened while retaining the key data content for users. In addition to strengthening justice statistics, means to develop data production related to criminal and justice statistics are explored in cooperation with administration.
Restructuring of debts	Production of the statistics is suspended.	Statistical reference year 2027		The quarterly statistics are suspended for the time being as Statistics Finland's individual data resources are renewed. The aim is to produce more extensive statistics on indebtedness in future. The schedule will be revised during 2027.

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
3. Work, wages and livelihood				
Statistics on labour disputes	Production of the statistics continues unchanged.			
Index of wage and salary earnings	Production of the statistics continues as reduced.	Statistical reference year 2027	The data of the statistics are published with reduced data content: the annual level release on earnings development standardised with occupational structure is discontinued. The number of releases decreases from five to four.	The production process of the statistics will be lightened while retaining the key data content for users: monitoring and comparison of earnings development by sector, industry and sex.
Wages and salaries in the Incomes Register (experimental statistics)	Production of the statistics is discontinued.	Statistical reference year 2027	The production of the monthly experimental statistics is discontinued.	Decisions on the production of experimental statistics are made at Statistics Finland annually depending on the resources available. Replacement data are available monthly in the Tax Administration's statistical database under Incomes Register .
Inheritances and gifts (experimental statistics)	Production of the statistics is suspended.	Statistical reference year 2023	The production and development of the annual statistics is suspended instead of publishing data less frequently.	Decisions on the production of experimental statistics are made at Statistics Finland annually depending on the resources available. The production and development of the statistics can be continued if separate funding is found for the production.
4. Education and research				
Entrance to education	Production of the statistics is discontinued.	Statistical reference year 2026	Separate annual statistics are discontinued. Statistical data are produced with separate funding.	Data on the statistics on entrance to education are available in the education administration's reporting portal Vipunen https://vipunen.fi/en-gb/

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
Progress of studies	Production of the statistics is discontinued.	Statistical reference year 2025	Separate annual statistics are discontinued. Statistical data are produced with separate funding.	Data on the statistics on progress of studies are available in the education administration's reporting portal Vipunen https://vipunen.fi/en-gb/
Discontinuation of education	Production of the statistics is discontinued.	Statistical reference year 2025	Separate annual statistics are discontinued. Statistical data are produced with separate funding.	Data on the statistics on discontinuation of education are available in the education administration's reporting portal Vipunen https://vipunen.fi/en-gb/ .
Transition from school to further education and work	Production of the statistics is discontinued.	Statistical reference year 2025	The present annual statistics are discontinued. Statistical data are produced with separate funding. The data are available in the education administration's reporting portal Vipunen. The renewed statistics on educational paths will be published concerning the statistical reference year 2025.	The renewed statistics on educational paths combine key data of the previous statistics on educational flows into one publication. The education administration's expertise, data from discontinued statistics and combining data are utilised in the release.
5. Culture, media and time use				
No changes				
3.6 Health and social protection				
No changes				
4. Sustainable development and the environment				
4.1. Energy				
Energy prices	Production of the statistics continues unchanged.			
4.2. Environment and nature				
No changes				
4.3 Agriculture, forestry and fishing				

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
Statistics on the finances of agricultural and forestry enterprises	In future, the statistics are published at set intervals.	Statistical reference year 2028	The data for the statistical reference year 2025 will still be published with the present data content in 2027, the content of the statistics will be developed in 2028 to 2029 and the data for the statistical reference year 2028 will be published with the renewed data content in 2030.	The publication of the statistics is suspended for the duration of content development. The aim is to add joint-stock farms to the data content and thus improve the quality and coverage of the statistics in accordance with the feedback received in the consultation.
4. Transport and tourism				
Merchant fleet	Production of the statistics is discontinued.	Statistical reference year 2027	The production of the quarterly statistics is discontinued.	The Finnish Transport and Communications Agency Traficom will in future publish the data.
Finnish road statistics	Production of the statistics is discontinued.	Statistical reference year 2027	The Finnish road statistics will be published for the statistical reference year 2026	The Finnish road statistics are based on data from the Finnish Transport Infrastructure Agency's information system Tievelho. The Finnish Transport Infrastructure Agency is responsible for the Finnish road statistics starting from the statistical reference year 2027.
First registrations of motor vehicles	Production of the statistics is discontinued.	Statistical reference year 2027	The production of the monthly statistics is discontinued.	The Finnish Transport and Communications Agency Traficom, which is responsible for the transport register, produces data on first registrations of motor vehicles by expanding its existing data production.
Motor vehicle stock	Production of the statistics is discontinued.	Statistical reference year 2026	The production of the annual statistics is discontinued.	The Finnish Transport and Communications Agency Traficom, which is responsible for the transport register, produces data on motor vehicles by expanding its existing data production.

Statistics	Change/Decision	Change will be implemented	Description of change	Grounds
Statistics on road traffic accidents	The data content of the statistics is reduced.	Statistical reference year 2027	The statistics will still be published as monthly statistics. The production process of the statistics will be lightened especially as concerns the inspection processes of property damages.	The production process of the statistics will be lightened while considering the key data needs of data users. The changes are planned in cooperation with the transport sector and partly with their funding.
Game accidents (experimental statistics)	The production of the statistics is discontinued and the key annual data are included in the statistics on road traffic accidents.	Statistical reference year 2027	The key annual data of the statistics are included in the statistics on road traffic accidents.	Game accidents are a key part of the statistics on road traffic accidents.
